You're invited!

## Bring interactive salmon education to classrooms.

**What is it?** An interactive web challenge that uses actual data from tagged, migrating steelhead smolts and replays it as a race for survival where participants pick their favorite fish avatar, see if it survives, and learn about salmon and steelhead recovery in Puget Sound. (see some of our steely contenders on the right).

**Why?** To supplement local science education with real-world data and problems; suitable for 1st -12th grade.

# INTERESTED IN PARTICIPATING IN 2018?

*"My first and second grade students really enjoyed following the steelhead in Survive the Sound. Students were invested and engaged. They wanted to know more."*

*- Susan Foley, Elementary School Teacher*

## WHAT DOES SURVIVE THE SOUND BRING TO THE CLASSROOM?

- > STEM learning opportunities
- > Real world situations and data
- > No-cost educational curriculum
- > Fun imagery, content, and web interface
- > Environmental stewardship

*Curriculum available in early 2018. Game begins in May 2018.*
